Packaging & Labeling Specification

Standard packaging, label contents and export information

XT-DL-04 · 2026-11 · xtdiamond.com · sales@xtdiamond.com

A · Standard packaging

Product	Standard inner pack	Notes
Diamond micron powder	5 / 10 / 50 / 100 ct vials, or per order	Diamond is priced by carat (1 ct = 0.2 g); moisture-proof sealed vials with cushioning
Diamond grinding paste	5 g / 10 g / 20 g syringes or jars	Syringes allow metered application; sizes can be customized per order
Outer packaging	Export carton with cushioning fill	Determined by order volume and destination shipping mode

B · Label contents

Label item	Description
Product name & type	Micron powder / grinding paste; carrier (oil-soluble / water-soluble)
Grade designation	W grade with micron range (as confirmed in the order)
Batch number	Matches COA and PSD report; fully traceable
Net content	Carats / grams, per order
Production & inspection date	Year-month
Country of origin	Made in China
Storage instructions	Keep sealed, dry, at room temperature; avoid contamination

C · Export information

Item	Description
HS code	7105.10 (dust and powder of natural or synthetic precious or semi-precious stones — of diamond)
Declared description	Synthetic diamond powder / diamond grinding paste (per actual product)
Transport classification	Non-dangerous goods; ships as general cargo (air / sea / courier)
Custom labels	Neutral labels or customer-specified formats arranged on request

Packaging, labeling and dispatch requirements are set per order and destination; the above is the standard configuration. For special packaging (vacuum, nitrogen-flushed, customer-branded labels), state it in your enquiry; feasibility and lead time are confirmed at quotation.
